have no general meaning. Of these examples this work contains more than five times as many as any other Dictionary hitherto published.

For practical purposes the arrangement of the work is so complete, that a reference to its pages enables a person who understands English to journalists, students and natives who understand nothing but Chinese. In this respect the work will be found indispensable to all Europeans reading in China, and to the natives themselves, it explains Chinese subjects fully, with which very few of them are perfectly acquainted. It is a permanent resident in England and interested in China it cannot but be invaluable occasionally.

It comprises upwards of two thousand large quarto pages.
